with RPA

Automate ERP Processes

Improve efficiency by applying RPA bots to handle creating and disseminating reports, process invoices and check payment status against SLAs, and monitor and manage inventory.

Optimize Transportation

Management

Monitor all logistics with RPA bots to reduce human error and track all transportation costs and outcomes across carriers.

Automate Reporting and Administration

Get timely data and visibility across production and business systems with bot-generated reports.

Purchase Order Processing

Automate invoice processing for all vendors and eliminate errors and delays. RPA can extract invoice data in any format, request approvals, monitor payment status, and update systems.

Streamline Bill of Materials

Eliminate errors with RPA to manage BOM systems, send automatic change alerts and notifications, ensure regulatory compliance, and provide real-time reporting and analytics.

Vigilant Regulatory Compliance

Automating with RPA helps simplify compliance efforts through error-free processing and audit-ready reporting, and instantly applied changes when new regulations arise.

track inventory, delivering real-time reporting and inventory analysis to help you keep pace with demand fluctuations.

Customer/Vendor Support

Get attended RPA bots that work together with your support team. Bots handle the data and systems so your teams can focus on service level and customer/vendor relationships.

- Data Input and Correction
- Report Automation Invoicing & Billing Inbound-
- Outbound from Email & Excel
- Invoice and PO Process
- Inventory and BOM for Suppliers
- Data Entering into ERP IoT Connectivity with devices Automated Work Process

 HR Data Management
 Automated Screening & Recruiting

Make every business process lean.

RPA enables manufacturers to eliminate process and workflow waste across the enterprise.

Reduce costs in back-office.

Eliminate human error and increase compliance in business processes from HR to IT.

Build a resilient supply chain.

Apply RPA+AI to make supply chain processes like onboarding new vendors more agile.

Increase go-to-market speed.

Deploy a Digital Workforce for faster process execution and maximal productivity.

Connect systems and access real-time data.

RPA works seamlessly across systems and can process IoT data and analyze information instantly.

Upgrade post-sale customer experience.

Drive loyalty with real-time data from RPA bots to improve support processes and anticipate customer needs.
